

FREQUENTLY ASKED QUESTIONS

1) What should you notice when wearing EnergyWave™? You will probably feel nothing. What you should notice is very constant and stable levels of energy during your day. If you are performing an athletic activity, you will be able to measure improvement in how many reps of an exercise you can perform or how long you can exercise without getting as fatigued. (TAKE THE ENERGYWAVE™ WORKOUT TEST ON THE FLIP SIDE)

2) How does EnergyWave™ work if nothing enters the body? EnergyWave™ communicates with the body through the human electromagnetic field. This is known as resonant energy transfer.

3) What is in the patches? The patches contain a patent-pending blend of amino acids, sugars, oxygen and water.

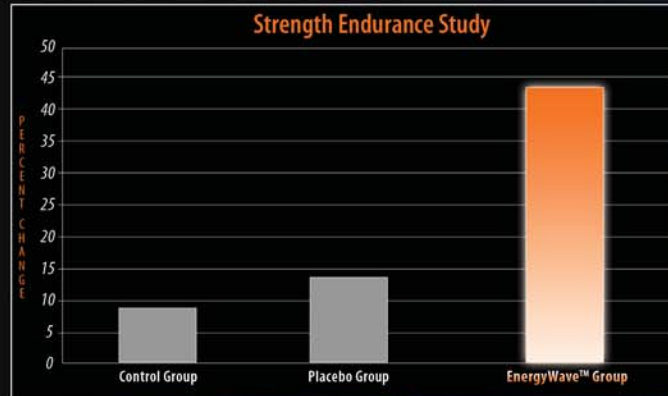

4) Is this a transdermal patch? What goes in the body? Nothing enters the body; EnergyWave™ IS NOT a transdermal patch. LifeWave NC™ patches are a completely new technology with a new approach to energy and well-being.

5) Has EnergyWave™ been clinically tested? Yes, EnergyWave™ has been clinically tested at major universities. Independent double-blind studies prove that EnergyWave™ gives you an increase in energy and stamina in the first use.

6) How long should I wear the patches? It is recommended that you wear these patches for no more than 12hrs - 14hrs per day.

7) How often should I wear the patches? For best results use the patches A) every other day or B) 4 days on, 3 days off unless instructed otherwise by your doctor.

8) What is the difference between the 2 patches? One is positive (white) and the other (tan) is negative. They interact passively with the body's electromagnetic field. Both patches are required for maximum effect.

A double-blind placebo-controlled study was conducted to determine the effects of EnergyWave™ on strength endurance (stamina).

A group of athletes were asked to perform as many repetitions as possible of a 225-pound bench press. The athletes were then tested a week later.

The Control group did not use any patches. The Placebo group used patches that did not contain active materials. The EnergyWave™ group used the active patches.

As can be seen from the graph, the group using EnergyWave™ experienced a 43% increase in the number of repetitions they could perform.

We certify that the EnergyWave™ patches have been manufactured at FDA registered facilities in the U.S.A. and in accordance with the specifications in the patent filing. LifeWave NC™ does not endorse claims or have scientific proof that its products are effective in the cure, mitigation, treatment or prevention of disease in man or animal.

ENERGYWAVE™
STAMINA ENHANCER

INCREASES ENERGY
MAXIMIZES ATP PRODUCTION
ENHANCES PERFORMANCE
ACCELERATES FAT BURNING
